PROFESSIONAL SUMMARY

Industrial engineer, Power Platform specialist, and AI solutions architect with 4 years of experience in automation and low-code development, alongside 10+ years leading operations and process improvement. Proven track record designing and delivering end-to-end enterprise solutions using Power Apps, Power Automate, Microsoft Copilot Studio, Azure AI, Power BI, SharePoint Online, and Dataverse — from initial requirements analysis to production monitoring.

Experienced leading technical teams and establishing development standards, governance frameworks, and best practices for low-code environments. Strong background in process improvement and operations management that enables a business-first approach to solution architecture.

Microsoft Certified: Power Platform Fundamentals (PL-900). Currently pursuing AB-100 certification.

TECHNICAL SKILLS

Power Platform	Power Apps (Canvas & Model-Driven), Power Automate (Cloud & Desktop), Power BI, Power Pages, Copilot Studio.
Microsoft 365	SharePoint Online (sites, libraries, lists, permissions), Excel (Macros, Power Query, Pivot Tables), Access, Outlook automation
Data & Integration	Dataverse, REST APIs, SQL, Microsoft Connector ecosystem
Development	VBA / Macros, JSON
Methodology	Scrum (SMPC certified), Lean Manufacturing

PROFESSIONAL EXPERIENCE

Development Consultant | Perfieria IT / Vanti

Sep 2023 – Jul 2026

- Lead end-to-end solution architecture and technical strategy for Power Platform and AI projects, covering requirements analysis, technical feasibility assessments, system design, deployment, and production monitoring.
- Design and deploy custom conversational AI agents and intelligent copilots using Microsoft Copilot Studio, integrating them with enterprise data sources and workflows.
- Manage and mentor a team of 3 Power Platform developers, defining development standards, governance frameworks, and best practices that improved delivery consistency across projects
- Design integration architectures combining Power Apps (Canvas & Model-Driven), Power Automate (Cloud & Desktop), SharePoint, Dataverse, REST APIs and Azure AI tools to solve high-impact enterprise operational needs.
- Delivered 15 production projects including cloud flows, desktop flows, Canvas Apps, and SAP GUI automation using Power Automate Desktop — covering the full Microsoft low-code ecosystem.
- Serve as technical reference point ensuring solution scalability, maintainability, and alignment with client business objectives

Power Platform Developer | Fortion SAS *Jan 2023 – Sep 2023*

- Developed Canvas Apps and Model-Driven applications within the Microsoft 365 ecosystem, ensuring standardized data entry and optimized user experience
- Built automated cloud flows in Power Automate to streamline document management processes, reducing manual intervention in document table generation
- **Featured Project — Document Management Solution (Administrative & Archival Services):** Designed and delivered a full end-to-end Power Platform solution using Dataverse as the data layer. Built a Canvas App for standardized document data entry, automated documentary table generation through Power Automate cloud flows, and developed a Power BI report for process visualization and tracking — covering the complete Power Platform stack in a single production deployment.

Operations Coordinator | Computec Outsourcing *Jul 2016 – Aug 2022*

- Coordinated a team of 14 specialists responsible for digital document processing and delivery, ensuring SLA compliance and continuous process improvement
- Automated internal reporting and data tracking using Excel Macros and Access forms, reducing manual processing time for document management workflows
- Initiated Power Platform adoption within the operations area by designing and deploying the first automation solution using Power Apps and Power Automate for the engineering procedures publication process — marking the transition from manual workflows to low-code automation

Production Manager | Maviltex SAS *Nov 2010 – Sep 2015*

- Led manufacturing operations and production planning, overseeing process efficiency and team performance in a mid-size industrial environment.

Assemblies Engineer | CI Nicole *Aug 2008 – Nov 2010*

- Supported assembly line operations and process standardization in a manufacturing setting.

EDUCATION

Production and Operations Management Specialist *2012*
Universidad Nacional de Colombia

B.S. Industrial Engineering *2008*
Universidad Nacional de Colombia

CERTIFICATIONS

Microsoft Power Platform Fundamentals (PL-900) *2022*

Scrum Master Professional Certificate (SMPC) *2021*

Lean Manufacturing *2011*
